ART. 811

Tazza “Cappuccino” con piattino
in acciaio inox 18/10.

Stainless steel 18/10 “Cappuccino” cup with saucer.

Tasse “Cappuccino” avec soucoupe en acier inox 18/10.

“Cappuccino” tassen mit untertasse aus Edelsthal 18/10.

Taza para “Cappuccino” con platito de acero inoxidable 18/10.

INOX 18/10

ART. 821

Caratteristiche delle tazze in acciaio inox 18/10:

- Termiche.
- Lavabili in lavastoviglie.
- Impilabili per ottimizzare lo spazio.
- Antiribaltamento durante la movimentazione.
- Il piattino in acciaio può essere utilizzato come coperchio.

Il mantenimento del calore della bevanda viene garantito dalla "camera termica" creata dalle pareti di acciaio stampato, NON SALDATO; la stessa isola la parete esterna della tazza prevenendo il rischio di ustione.

Lavabile in lavastoviglie.

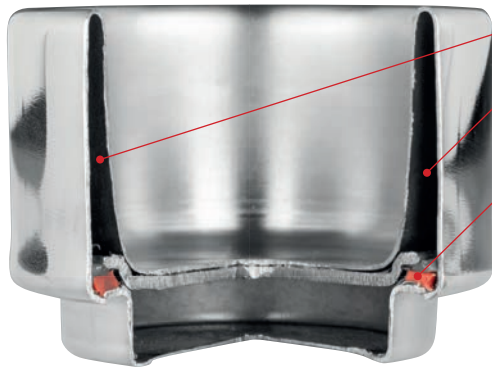

Il calore dell'acqua della lavastoviglie provoca la dilatazione del metallo.

Con l'inserimento della guarnizione tra i due componenti della tazza (corpo e fondello) viene impedito all'acqua di entrare all'interno della "camera termica".

Le tazze sono impilabili una sull'altra consentendo un'ottimizzazione degli spazi. L'accoppiamento tra la tazza e il piattino rende difficile lo scivolamento e il ribaltamento della tazza durante la movimentazione.

Il piattino può essere utilizzato come coperchio della tazza stessa.

Characteristics of the 18/10 stainless steel cups:

- Thermals.
- Dishwasher safe.
- Stackable to optimize space.
- Anti-rollover during handling.
- The steel saucer can be used as a lid.

The maintenance of the heat of the drink is guaranteed by the "thermal chamber" created by the pressed steel walls, NOT WELDED; the same insulates the outer wall of the bowl, preventing the risk of burns.

Dishwasher safe.

The heat of the water from the dishwasher causes the metal to expand.

By inserting the gasket between the two components of the cup (body and bottom), water is prevented from entering the "thermal chamber".

The cups can be stacked on top of each other, allowing space optimization.

The fit between the cup and saucer makes it difficult for the cup to slip and tip over during handling.

The saucer can be used as a lid for the cup itself.

Caractéristiques des tasses en acier inox 18/10 :

- Thermiques.
- Lavable au lave-vaisselle.
- Empilable pour optimiser l'espace.
- Anti-renversement lors de la manutention.
- La soucoupe en acier peut être utilisée comme couvercle.

Le maintien de la chaleur de la boisson est garanti par la "chambre thermique" créée par les parois en acier embouti, NON SOUDÉES; le même isole la paroi extérieure du bol, évitant le risque de brûlures.

Lave-vaisselle.

La chaleur de l'eau du lave-vaisselle provoque la dilatation du métal.

En insérant le joint entre les deux composants de la coupelle (corps et fond), l'eau est empêchée de pénétrer dans la "chambre thermique".

Les tasses peuvent être empilées les uns sur les autres, ce qui permet d'optimiser l'espace.

L'ajustement entre la tasse et la soucoupe rend difficile le glissement et le renversement de la tasse lors de la manipulation.

La soucoupe peut être utilisée comme couvercle pour la tasse elle-même.

Eigenschaften der Edelstahlbecher 18/10:

- Thermik.
- Spülmaschinenfest.
- Stapelbar, um den Platz zu optimieren.
- Anti-Rollover während der Handhabung.
- Die Untertasse aus Stahl kann als Deckel verwendet werden.

Die Aufrechterhaltung der Wärme des Getränks wird durch die "Thermalkammer" garantiert, die durch die gepressten Stahlwände geschaffen wird, NICHT GESCHWEISST; dasselbe isoliert die Außenwand der becher und verhindert so die Gefahr von Verbrennungen.

Spülmaschinenfest.

Durch die Hitze des Spülwassers dehnt sich das Metall aus.

Durch das Einlegen der Dichtung zwischen den beiden Komponenten des Bechers (Körper und Boden) wird verhindert, dass Wasser in die „Wärmekammer“ eindringt.

Die Becher können übereinander gestapelt werden, was eine Platzoptimierung ermöglicht.

Die Passung zwischen Tasse und Untertasse erschwert ein Verrutschen und Umkippen der Tasse während der Handhabung.

Die Untertasse kann als Deckel für die Tasse selbst verwendet werden.

Características de las copas de acero inoxidable 18/10:

- Térmicas.
- Aptas para el lavavajillas.
- Apilable para optimizar el espacio.
- Antivuelco durante la manipulación.
- El plato de acero se puede utilizar como tapa.

El mantenimiento del calor de la bebida está garantizado por la "cámara térmica" creada por las paredes de acero prensado, NO SOLDADAS; el mismo aísla la pared exterior del recipiente, evitando el riesgo de quemaduras.

Aptas para el lavavajillas.

El calor del agua del lavavajillas hace que el metal se expanda.

Al insertar la junta entre los dos componentes de la taza (cuerpo y fondo), se evita que el agua entre en la "cámara térmica".

Los vasos se pueden apilar unos encima de otros, lo que permite optimizar el espacio.

El ajuste entre la taza y el platillo dificulta que la taza se deslice y vuelque durante la manipulación.

El plato se puede utilizar como tapa para la taza.

OPERA APERTA

SERIES

Design by Ghigos Ideas

UN SET DA CONDIMENTO “INDETERMINATO”

un set olio-aceto-sale-pepe che finalmente, nella sua provocatoria “indeterminatezza”, potrà accogliere al suo interno ciò che ognuno più desidera portare in tavola. ecco così un set che si propone come “un’opera aperta”: flessibile, componibile, facilmente personalizzabile e implementabile, che potrà adattarsi ad ospitare contenitori dalle forme e dalle dimensioni disparate, per commensali davvero esigenti.

generoso nel contenuto, pur nella sua versatilità il prodotto assume una chiara identità formale.

SERIE MONUMENTALE

“Opera aperta” è utilizzata anche per rappresentare alcuni famosi monumenti dalle forme riconoscibili: chiese, architetture, infrastrutture ed un centro storico sono qui ridisegnati con i loro contorni astratti per diventare regali originali, o set da tavola iconici per alberghi e ristoranti turistici.

Il “Duomo” celebra i prodotti storici dell’azienda (le classiche ampolle) con un atto di matrimonio simbolico, che si svolge all’interno del monumento; il “Golden Gate Bridge” con le sue colonne di salita e discesa, la Grande Muraglia Cinese creata con i moduli che si possono combinare all’infinito a ricreare la reale scala epica; il “Colosseo” con la sua forma ovale iconica che incute rispetto... È possibile creare un numero infinito di combinazioni con queste semplici ed eleganti aste.

AN INDETERMINATE CONDIMENT SET

An Oil-Vinegar-Salt-Pepper set that finally, in its provocative “indeterminacy”, will accommodate what everyone wants to bring to the table.

This set is an open work: flexible, modular, easily deployable and customisable, which can be adapted to accommodate containers of varied shapes and sizes for very demanding diner. Generous in content, despite its versatility, the product has a clear formal identity.

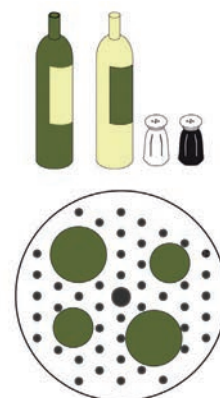

A “MONUMENTAL” SERIE

“Open work” is used also to represent some famous monuments with recognizable shapes: churches, architectures, infrastructures and an old town centre are here reshaped with their abstract outlines to become original gifts, or iconic table sets for turistic hotel and restaurants. The Duomo celebrates the historical brand products (the small glass bottles for oil and vinegar) with a symbolical marriage act taking place inside the monument, the Golden Gate Bridge with its rising and falling columns, the Great wall of China created with modules that you can combine perpetually to recreate the epic scale of the real thing, or the Coliseum with its iconic oval shape that commands respect... You can create an endless number of combinations with these simple beams.

AZIENDA COMPANY

MADE IN ITALY

Con un patrimonio di settant'anni di esperienza, è presente nei mercati di tutto il mondo ed è riconosciuta per la sua produzione qualificata ed altamente professionale.

L'esperienza, la tecnologia avanzata, la serietà, il dinamismo ed uno straordinario design estetico sono i punti di forza di un'azienda che è riuscita ad evolversi nel tempo, mantenendo inalterato l'elevato standard qualitativo.

Fondata ad Omegna nel lontano 1953 come "T. Smorgoni", specializzata nella lavorazioni conto terzi, ad opera di Teobaldo Smorgoni, è all'inizio una piccola realtà fondata su basi artigianali che riesce in poco tempo a trasformarsi, grazie all'abilità imprenditoriale del suo fondatore, in un'efficiente industria con attrezzature e macchinari di avanzata concezione tecnologica.

Da questo momento in poi si afferma con un'importante produzione di articoli di design in acciaio inox per la tavola, da regalo e per uso alberghiero commercializzati con il brand.

La lavorazione dell'acciaio inox, materiale prediletto dai designers di tutto il mondo per la sensazione di modernità, inalterabilità e purezza che trasmette, è il core business della STO S.r.l..

Unendo la trasparenza del vetro, quasi totalmente prodotto con stampi di sua proprietà, alla luminosità dell'acciaio, viene creata una vera e propria alchimia, perfetta per i complementi d'arredo di tavole domestiche o del settore alberghiero.

STO S.r.l., with a patrimony of seventy years of experience, is present in all markets of the world and is recognized for its professional and highly qualified production. The experience, advanced technology, reliability, dynamism and an extraordinary design aesthetic are the strengths of a company that has been able to evolve over the time, preserving the high quality standard.

Established in Omegna (still current operating site) back in 1953 as "T. Smorgoni", specializing in bespoke work, by Teobaldo Smorgoni, is at the beginning a small company founded on bases artisan who manages to turn in a short time, thanks to the skill of its founder, into a viable industry with advanced and technological equipment machineries.

From this moment on, it states with a significant production of stainless steel items for the table, gift items and articles to be used in hotels with the brand.

The manufacturing of stainless steel, favoured material of designers of around the world for the feeling of modernity, purity and incorruptibility that transmits, is the core business of STO S.r.l..

Combining the transparency of the glass, almost entirely produced by molds of his property, the brightness of the steel, it creates a real alchemy, perfect for home tableware items or for the hotel industry.

Praticità e design, aspetti sempre presenti nei progetti della nostra azienda, assecondano i più disparati cambiamenti di mode.

Uno stile capace di soddisfare un'esigenza estetica che non ha confini e limiti di età.

Uno stabilimento completamente rinnovato, progettato e curato fin nei minimi dettagli, costituisce ad oggi una validissima unità produttiva, funzionale e particolarmente vivibile per chi vi lavora: l'osservanza delle norme previdenziali stabilite dalla legge e la cordialità nei rapporti interpersonali si integra perfettamente alla costante ricerca di un ambiente ottimale nel quale lavorare e produrre.

Per contenere e ridurre l'impatto delle sue attività sull'ambiente la STO S.r.l. ha adottato un sistema di gestione ambientale che si concretizza nell'attuazione di specifici programmi di prevenzione dell'inquinamento e di miglioramento di tutto ciò che riguarda l'impatto ambientale.

Strettamente legata alle sue origini ed al territorio nel quale sorge, la STO S.r.l. è impegnata a promuovere lo sviluppo dell'area locale ed è protagonista di moltissime iniziative sociali sia in campo sportivo che a livello benefico.

Practicality and design, aspects that are always present in our company's projects, support to the most diverse changes in fashions.

A style that is able to satisfy an aesthetic requirement, that has no boundaries and age limits.

An establishment completely renovated, planned and edited down to the smallest details, is today a very valuable production unit, functional and liveable particularly for those who work there: the observance of the rules laid down by the security and welfare laws, and the friendliness in interpersonal relationships, seamlessly integrates to the constant search for an optimal place in which to work and produce.

To contain and reduce the impact of its activities on environment, STO S.r.l. adopted an environmental management system that is realized in the implementation of specific programs of prevention of pollution and improvement of everything related to the environmental impact.

Closely linked to its origins and to the territory in which it stands, the STO S.r.l. is committed to promoting the development of the local area and has a leading role in many social initiatives in sports and beneficial.
